Projects:

- Nearby place finder, 06 Months

I have done this project during my college time under the guidance of a teacher. It helps the user to find its required location by giving a radius to find under.

- Face Mask Detection, 12 Months

I developed this application in my BE. This is a web application we developed in the COVID-19 situation to help society to follow the government rules and to reduce manual work. This application helps to keep eye on people and to the aware organizer if the person wearing a mask or not.
